

CLAUDE (ANTHROPIC)

The Productivity Architect Series: Word & Creative Strategy Edition

1. WHAT IT IS

The **Nuanced Craftsman**. Claude is known for high emotional intelligence, sophisticated writing, and a massive 'context window' that allows it to analyze entire books or complex codebases in one go.

2. WHAT IT IS NOT

It is **not a real-time search engine** (like Perplexity) and it does not live natively inside your MS Office apps (like Copilot). It is an external architect that requires manual 'hand-offs' of data.

3. WHY USE IT FOR WORD & CREATIVE STRATEGY?

Claude is the best tool for **drafting long-form educational content** or curriculum. Use it when you need a tone that feels human, empathetic, and structurally complex rather than purely functional.
