

THE ARCHITECT'S MANUAL

JOB SITE CONNECTIVITY & TROUBLESHOOTING

1. Audio & Visual (Site Communication)

THE ISSUE: I can't hear the Chief Architect speaking.

THE FIX: Navigate to **User Settings** (Gear Icon ) > **Voice & Video**. Ensure **Output Device** is set to your headphones. Use the "Let's Check" tool.

THE ISSUE: The Screen Share is blurry or lagging.

THE FIX: Close background apps (Chrome/Netflix). Hover over the stream and click the **Cog** to manually lower resolution to **720p/30fps**.

2. Navigation (Finding Blueprints)

THE ISSUE: Too many notifications / Noise.

THE FIX: Right-click any category and select **Mute Category**. Keep **#announcements** and **#submittals** unmuted.

3. Submittals (Turning in Work)

Command / Action	Blueprint Result
<code>Upload File</code>	Files up to 25MB. For larger files, paste a Cloud Link (Google Drive/OneDrive).
<code>Check Threads</code>	Specific feedback on your build is stored in a Thread under your post.

4. Quick-Command Guide

<code>Ctrl + K</code>	Quick Switcher: Teleport to any channel instantly.
-----------------------	---

Shift + Esc	Clear Site: Marks all channels as read instantly.
Ctrl + /	Manual: Shows all keyboard shortcuts.

STRUCTURAL NOTE: If your office firewall blocks the app, use the **Discord Mobile App** on cellular data or the **Web Browser** (discord.com/app).
