

DESIGNER & PRESENTER COACH

The Productivity Architect Series: PowerPoint Edition

1. WHAT IT IS

A **Visual Architect** that transforms bullet points into visual narratives. It manages slide hierarchy, suggests iconography, and provides real-time coaching on your delivery and narrative pace.

2. WHAT IT IS NOT

It is **not a content creator**. It cannot define your 'Why.' It is also not a teleprompter; using it to simply read more text off a screen defeats the architectural purpose of a visual aid.

3. WHY USE IT FOR POWERPOINT?

PowerPoint is the 'Showroom.' Use AI here to **ensure your message isn't lost in the noise**. AI handles the alignment and 'eye-lines' so your audience stays focused on the story you are telling.
