

Video P-1.3: The 80/20 Rule

Course: Vault-P Office Productivity & Workflow Engineering

MODULE OVERVIEW

Goal: Identify the 20% of tasks generating 80% of value.

1. CONTEXT (THE HOOK) [0:00 - 0:25]

Most of what you do doesn't matter. Today, we're finding the critical 20% that builds your legacy.

2. ROLE (THE STRATEGIC DEMO) [0:25 - 1:45]

The Pareto Principle for Architects: Sorting 'Brick-laying' from 'Dust-clearing'.

3. ACTION (THE PRO TOOLS) [1:45 - 3:00]

Demo: Audit a typical task list and highlight the 2 items that actually drive project completion.

4. FRAMEWORK (THE STUDENT TASK) [3:00 - 3:45]

C.R.A.F.T. Task: Look at your list. Circle the two items that, if finished, make the others irrelevant.

5. TARGET (THE WRAP-UP) [3:45 - 4:00]

Build the 20%, ignore the rest. I'll see you in the next build.

Production Checklist for Michael:

Visual: Pareto chart overlay. Action: Live sorting of a task list on screen.
