

# Video P-3.2: Energy Mapping

Course: Vault-P Office Productivity & Workflow Engineering

## MODULE OVERVIEW

**Goal:** Matching cognitive load to biological energy rhythms.

### 1. CONTEXT (THE HOOK) [0:00 - 0:25]

Productivity isn't just about managing time; it's about managing energy. Not all hours are created equal.

### 2. ROLE (THE STRATEGIC DEMO) [0:25 - 1:45]

Circadian Architecture: We align 'Deep Work' with peak energy and 'Shallow Work' with the afternoon dip.

### 3. ACTION (THE PRO TOOLS) [1:45 - 3:00]

Demo: Categorizing a task list into 'High Fuel' (Writing/Strategy) and 'Low Fuel' (Expense reports/Filing).

### 4. FRAMEWORK (THE STUDENT TASK) [3:00 - 3:45]

C.R.A.F.T. Task: Map your typical day. When are you sharpest? Move your 'Hard Things' to that window.

### 5. TARGET (THE WRAP-UP) [3:45 - 4:00]

Respect the rhythm, master the output. I'll see you in the next build.

#### Production Checklist for Michael:

Visual: A waveform graph showing high and low energy periods throughout a standard work day.
