

Production Script: W-1.3 The PDF Barrier

I. HOOK

"We've all been there: you have a PDF and you need it to be a Word doc. Stop re-typing. Look at Section 1.3 of your Blueprint."

II. SHOW

"Go to File > Open. Select your PDF. Word is going to warn you it's converting. Click 'OK.' Watch as the static PDF becomes an editable Architect's canvas."

III. TASK

"Find a PDF on your desktop. Open it in Word now. Change one headline, and save it as a .docx. The barrier is gone."
