

WORD ARCHITECTURE WORKSHOP

MASTERING MS OFFICE + AI LEVERAGE | MICHAEL SMITH, M.S. ED.

Move from manual labor to professional architecture. This curriculum is designed to rebuild your workflow from the foundation up, integrating AI as a power tool rather than a shortcut.

PHASE 1: THE CORE FOUNDATION

1.1 STRUCTURAL INTEGRITY

Master Styles, the Navigation Pane, and Global Formatting. Stop "painting bricks" and start building scalable document skeletons.

1.2 LAYOUT ENGINEERING

Master Section Breaks, independent Headers/Footers, and Document "Firewalls" to ensure your layout never breaks under pressure.

PHASE 2: AI LEVERAGE & MANAGEMENT

2.1 THE CONTEXT ARCHITECT

Master the 4-Pillar Prompting Formula (Role, Context, Constraint, Standard) to direct AI with professional precision.

2.2 THE JUNIOR EDITOR

Learn to stress-test AI logic, perform reverse-outlining, and remove "robotic fluff" to maintain high-quality human standards.

Phase 3: The Custom Master Build

The Educator Build

Automated differentiation for 3+ reading levels. Rubric engineering and AI-assisted assessment loops.

The Student Build

Socratic "Sparring" to find logic holes. Anchoring AI claims to primary sources for total academic integrity.

The Executive Build

Synthesizing raw meeting transcripts into 1-page action memos. AI-enforced brand tone and template consistency.
